

# Welcome to PHOTOMETA .!

Welcome to the photometa Whitepaper! Here you'll find everything you need to know about the photometa.

**PHOTOMETA is a Click-N-Earn web3.0 NFT app protocol on PoA.**

Photometa is built around an important daily activity for most people — photography.

Users choose the activity they like and earn on it.

In order to do so users equip themselves with AVATAR in the form of photoner camera,.

By doing their favorite photography, users earn token that can be used in-game or cashed out for profit.

Through Photometa, we aim to support and motivate millions of people on their path to a habitual life, fight climate change, and connect the public to Web 3.0, while building on the POA aspect to create a long-term platform that facilitates Web 3.0 user-generated content creation.

# Rewards

**PM** and **ST** are the two tokens of our platform. **ST** is our in-app unlimited token and **PM** is the **governance token** which is limited to **40,000,000 tokens**.

Based on our burning system, management, in-app activities, sponsorships, and limited supply of tokens, the value of our token will be on a constant rise.

By the distribution of our tokens gradually **PM** will become a decentralized community-owned organization and in the future, **PM** token holders will have the ability to vote for any upcoming plans.

# PHOTOMETA's Sustainability Plan

First of all, *photometa*'s revenue-sharing plan is not based on rewarding current players by getting new players, rather *photometa*'s revenue model is based on being supported by external contributions.

Funding and Backed by Investors
---------------------------------

Brand and Sponsor Collaborations
----------------------------------

Rare NFT collection Revenue Model
-----------------------------------

# Referral System

Everything you want to know about our Referral System.

Everyone has the opportunity to optimize their rewards by being photometa. Users can use the **referral link** to **invite friends** to register and **earn prizes** through our referral program. *You can get referral bonuses through the app.*

- |  |
|--|
| • Only <b>new users</b> can be invited.  |
| • Each user can generate <b>1 unique referral link</b> .   |
| • Referral rewards from photometa will be sent to the user's <b>referral balance</b> which needs to be claimed manually. |

# AOP –Avtar of Photonic

This page will help you answer any questions you may have about AOP.

These are 5 different AOP's

**AOP** are face shaped like cameras, that's because we want you to earn with your wealth. AOP's in 5 different categories. Here is the list of AOPs.

- *Argos*
- *Pentox*
- *Lomon S*
- *Yoshiko D*
- *Legendo X*

Each one of them has different attributes and earning systems. Search through them, pick your favorite one, Buy your AOP and start your journey on photometa. Now we arrive at the attributes of AOPs and the usage of each feature. • **Energy:** Every photo that users upload will consume Shutter count. • **Pixel:** users participating will consume pixels. • **Repair:** after a long time user used by AOP and consuming need to repair

# POA (Proof of Activity)

Here you can find out everything about Activity to Earn.

You may probably guess what these games are by their description: "**Activity-to-earn.**" Indeed, everyone can get tokens from their gaming activities. A business concept based on blockchain technology is called "**proof of activity.**" Simply said, users may be able to get cryptocurrency by participating in a game.

# How does it work?

After joining, **Photometa** users will choose from *5 different AOP's* categories symbolized as camera icons.

Each AOP category will come with different challenges and rules.

After getting your AOP you can start participating in the game.

Once started, contestants receive different themes every day from the beginning, once joined in a challenge users have 24 hours to post the best photograph of them with the assigned theme.

At the end of the contest, your photos will be judged based on their creativity and image quality by our team and trusted AI.

Winners will be rewarded with our in-app rewards.

**Note:** Unwanted or illegal photos can reduce your rewards

# How to Play

1.

Sign up for free with your E-mail and complete your registration.

2.

Pick the AOP that matches your interest, you can purchase your **AOP** from in-app marketplace.

3.

Take part in the tournaments, complete tasks, wait for the results from the team and get rewarded.

4.

Equip your **AOPs** with **Lenses** in order to have more features.

Have Fun!

# How to Earn

The main earning method on the app is to do daily tasks and participate in tournaments after you claim your AOP. There are also **energies** that can contain earnings as well.

Transfer **PM** into your metamask wallet to be able to buy **AOPs**.

Cash out your rewarded tokens at any time.

# How to Participate

## How to participate in Photometa

### Register to Photometa

You can register for **Photometa** with your E-mail address after downloading the application on your device. You will be given a verification code that you must enter in order to use the app.

Transfer **PM** to your **Metamask Wallet** from the marketplace, Transfer **PM** to buy AOP

**Purchase an AOP** Head over to the in-app Marketplace and pick **any AOP**! You can use the Filter tool to look for the AOP of your Choice. Ensure you have enough in your wallet for the purchase.

*Congratulations!* You are ready. Energy will refill following the purchase of an AOP

\* You can begin your **photometa** trip,

Check out this article on our Medium to get a clear idea of how you can get better rewards

<https://medium.com/@photometa.club>

# Academy

The main mission of Photometa is to reward individuals for their daily photography and to increase the knowledge of photography and NFTs in our community.

We will also set up an academy where users can learn the latest in photography and NFTs, from well-known artists. Content shared in our academy will affect and guide our contest and evaluation process.

# Technology

As **Photometa**, we have combined your Phone cameras and Blockchain technology to offer you this application. Our aim is to provide you with a combination of habits and Technology to earn cryptocurrency. After opening your account on **Photometa**, you can access in-app events by purchasing **AOPs** and stepping into the technology-based world.

You know **Photometa** is the most new way to wealth.

## Mechanics

In **Photometa**, users will be able to take photos to participate in the competitions. Each user can buy, equip and upgrade their AOPs in the in-app store.

# Tokenomics

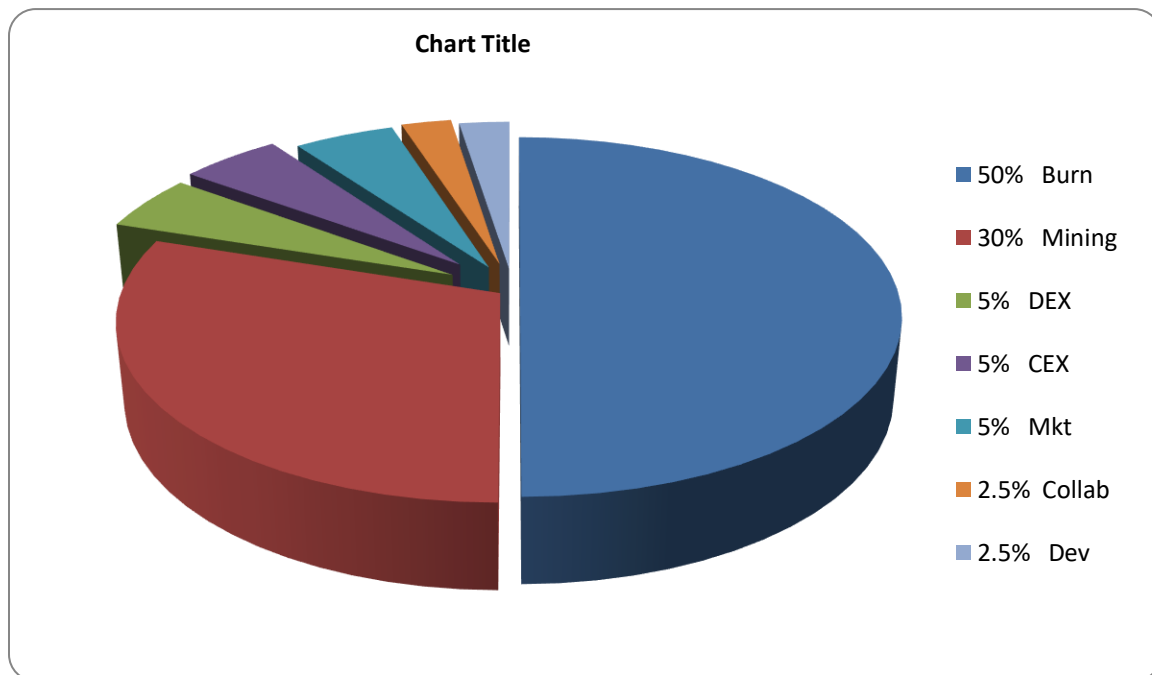

For information about Photometa tokens.

*Utility Token: ST ( in-app unlimited supply token )*  
*Governance Token: PM ( governance limited token )*

**PM**

The **PM** is our governance token, with a total of **40,000,000** minted on the Binance smart chain.  
Smart contract address: PM : 0xA94a557950B0A3810fe904Df87fc1D341D1227C

*PM token distribution*

# Photometa Governance Token (PM)

## What is (PM)?

Photometa Governance Token (PM) is a governance token that gives its holders a right to vote on proposed changes to the photometa platform. The idea is that rather than a single person or group controlling the direction of a platform, a community of users can influence decisions in a process known as governance. ***The token is available on Binance Smart Chain***

## What are the use cases of (PM)?

- PM is a governance token that will be used by anyone who wants to take part in making decisions for adding new photometa blockchain features.
- Holding PM will allow anyone to participate in the photometa Governance Portal. PM can be used as a crypto on the photometa platform.
- Affiliates and rewards that will help in the further distribution of PM to more users.
- Part of assets when purchasing AOP or assets on the photometa platform.

### Future plans for PM are as follows:

- Discounts on the game and AOP services.
- Collectible Marketplace, anyone interested in trading, selling or buying digital collectibles can utilize the token in a user-friendly environment.

## What is the price of (PM)?

PM was minted (Total Supply: 40,000,000) and distributed on presale with PinkSale. The price of the token depends on the users who trade them on exchanges. You can send them to your friends or you can even trade them with any other asset. any wallet that supports the Binance Smart Chain ecosystems can be able to send/receive it.

The price of the token is not something that the team is focused on. Instead, we are working on further improving the photometa platform.

### **How Will (PM) be Distributed?**

Referral campaigns Earn by taking tournaments doing tasks within the app.

Where can I get PM? PancakeSwap have enabled the trading of PM.

Check out this guide click here: [pacakelink](#) 00x00x0x0x0x0x0x0

**Does (PM) have a Roadmap?** Stay tuned for further announcements.

# What is PM used for?

Everything you can do with \$PM

## The new and best version of Exchange

**\$PM** is the main currency of the photometa ecosystem. Users can obtain **\$PM** by purchasing **AOPs** and participating in events or by buying on listed exchanges.

## Activity to Earn

It allows users to earn **PM** by completing tournaments and challenges with their photos and helps them buy in-game upgrades and earn more.

## Future Uses

The **PM** token will always remain the main token of the photometa ecosystem. We see no limit to expanding its use cases based on feedback and updates from the community or ecosystem.

# Contract Info

Here you can find our PM Token Contract Info Document.

PM contract info

# ST

**ST token** is the in-app **play & earn** token which has an unlimited supply and is earned when the user performs a task in the app.

**ST** is burned when the user consumes **ST** in the app.

Users can earn **ST** tokens by doing tasks. Photometa users can spend their **ST** tokens as in-game. They can buy ***energy, Event Tickets*** with ST tokens.

# Roadmap

This is our Roadmap for 2022 and 2023

Road map here.....
